

“ISOE Programme -Recent Activities”

Mr. Halil Burcin OKYAR, OECD/NEA

ISOE program through the 20th anniversary at last year, ISOE Terms and Conditions is under renewal and the office of nuclear regulation (an agency of the HSE) from the UK joined the ISOE program as a new regulatory authority participant.

From the perspective that ISOE Technical Centers (TCs) have crucial role for the sustainable management of the program, effectiveness should be evaluated with generally accepted mechanisms and performance reviews in the TCs.

Weighting

PI1: ISOE Database management (40 %)

PI2: Contribution and finalization of annual report (30%)

PI3: Network website management and TC input (15 %)

PI4: Other topics 15 %

Moreover, there is the establishment of a new ISOE rule for the vendors in ISOE symposia due to ethical reasons and in order to be neutral to all industrial actors, vendors should be excluded for any sort of awards during any type of ISOE activity, including symposia.

For clarity and transparency, it was also decided to have this statement in all ISOE symposium announcements and symposium leaflets (preferably on the cover).

In addition, the presentation introduces two draft reports on the Expert Group on Primary Water Chemistry and Source-Term Management (EGWC) and the Expert Group on Occupational Radiation protection in Severe Accident Management and Post-Accident Recovery (EG-SAM)
